Description of the event:

On August 23, a round table will be held on the topic "Science-business collaboration in terms of biotechnology and circular economy South-East Finland - Russia projects". The event will be attended by representatives of cross-border cooperation projects, as well as an expert of the Governing Body of the Russia-South-East Finland Cross-Border Cooperation Program Valentina Rimmovna Chaplinskaya.

The results of the activities of each participating project will be presented during the event, also the results of the current season of the Program will be summed up, and information about the upcoming season 2021-2027 will be announced. Participants will make short presentations and will be able to ask questions to each other. Ideas for improving the activities of projects can be proposed at the end of the event, as well as proposals for further cooperation, which will give a new impetus to the development of the cross-border cooperation program.

The main purpose of the round table is to understand the state of development of projects participating in the cross-border cooperation program, as well as to identify the possibility of their improvement through collective discussion.
